WORK EXPERIENCE

Samar Hospital & Research Center Pvt. Ltd. [https://www.facebook.com/SHRCJNK/?checkpoint_src=any]

Janakpur Dham, Nepal

IT Officer

July 2023 – Present

- Implementing strong security measures, including firewalls, VPNs, and multi-factor authentication, to protect sensitive patient and hospital data by local and international data protection standards.
- Maintain a real-time database of medical supplies, equipment, and pharmaceuticals to track availability and set up notifications for expiration dates, low stock, and restocking requirements.
- Optimizing workflows through automation and leveraging data analytics tools to create meaningful insights for hospital operations.
- Integrating and managing specialized hospital software and equipment into the IT infrastructure to ensure seamless compatibility and functionality.
- Generate reports on IT system performance, security incidents, and usage analytics.
- Providing technical support and training to hospital workers, resolving hardware, software, and systems issues to ensure operational efficiency.

INTERNSHIP

Level 9 Technology [<https://level9.tech/>]

Hattisar, Kathmandu, Nepal

Backend Developer – Django

January 2023 – April 2023

- Design and implement server-side logic using Django.
- Develop reusable and efficient code.
- Ensured data security with authentication, encryption, and authorization.
- Design and develop a database model using ORM.
- Ensure security and data integrity.
- Create and handle RESTful APIs to facilitate front-end and back-end communication.
- Manage the deserialization and serialization of data.

ACADEMIC PROJECTS

Nepal Tour and Travels Web Application

Kathmandu, Nepal

- Developed for the final year project for both mobile and desktop user languages using HTML, CSS, Bootstrap, JS, and Django.

Link: <https://github.com/RiteshYadav5298/NepalToursandTravel.github.io.git>

Portfolio Website

Kathmandu, Nepal

- Developed using HTML, CSS, and JavaScript with full responsiveness.

Link: <https://github.com/RiteshYadav5298/RiteshYadav5298.github.io.git>

Bike Inventory System

Kathmandu, Nepal

- Bike Inventory System is a Python-based application designed to manage the buying and selling of bikes. It helps users maintain an organized inventory, view available bikes, record transactions, and streamline bike dealership operations.

Link: <https://github.com/RiteshYadav5298/Inventory-System.git>

Recreation Center Management System (C#)

Kathmandu, Nepal

- Developed as part of an academic project, this desktop application manages child play areas by enabling child registration, activity scheduling, and staff administration.
- Included features such as role-based access, user-friendly interface, and usage analytics for admins.
